Enterprise Statement

The current organization voluntarily applies for certification of China Environmental Labelling and entrusts this organization for review based on relevant standard. The following contents should be filled by the current organization. The filled contents and provided documents should be true and valid and verified by the current organization. The current organization will take all various consequences due to false information.

The current organization commits that it understands all relevant requirements and basis for certification of environmental labeling, accept relevant check of CEC on the current organization (open all document records of all areas and product formula), sampling, test and follow-up supervision as well as paying fees in accordance with relevant requirements. It takes initiative to publicize China environmental label in its advertisement and product brochures and does not make any misleading or unauthorized statement. In case of suspension, cancel or withdrawal of the certificate, relevant enterprise should immediately stop the advertisement and publicity of its Chine Environmental Label; hand in all certificates or documents; and ensure correct use of the certificate of China Environmental Labelling Product, China Environmental Label or any part of the report. When the product violates any requirements for certification of China Environmental Labelling or relevant laws or regulations, relevant enterprise is willing to shoulder all resulting responsibilities.

Now the following products will apply for certification of China Environmental Labelling product (a separate page may be attached in case of not sufficient room):

Application Type: ☐ China Environmental Labelling certification

☐ China Environmental Labelling for low carbon

Nature of application: ☐ The initial certification ☐ Renewal

Technical requirement for environmental labeling products: _____

Name of the product unit applying for certification: _____

Registered trademark or brand: _____

Model and specifications of specific product: _____

Remark: Please list in detail of each product unit under certification application and specific model of each unit (A separate page may be attached) _____

Name and number of the quality standard for the product under certification application: _____

_____

Legal representative of certification consignor (signature or seal):

Certification consignor (official seal):

_____Date_____Month_____Year

1. Basic situation of the certification consignor							
Name of certification consignor					Country or region		
Uniform Social Credit Code/ Organization code							
Registration address of the Business License						Postal code	
Address						Postal code	
Contact		Tel.		Mobile		Fax	
Contact department		Email		Other contact information			
2. Basic information of the producer (manufacturer)							
Name of producer (manufacturer)					Country or region		
Uniform Social Credit Code/Organization code							
Registration address of the Business License						Postal code	
Contact		Tel.		Mobile		Fax	
Contact department		Email		Other contact			
3. Basic situation of the factory							
Name of manufacturing enterprise					Country or region		
Uniform Social Credit Code/ Organization code							
Registration address of the Business License						Postal code	
Actual production address						Postal code	
Contact		Tel.		Mobile		Fax	
Contact department		Email					
Other contact information				Ownership			
Amount of employees (in relation to the whole process of the product under certification application)				Amount of technicians & engineers			
If the manufacturing enterprise belongs to enterprises with certain scale (Annual revenue of main business over 20 million Yuan)						Yes☐ No☐	
Product description: (including the characteristics, functions and main raw materials of the product. A separate page may be attached) If there is any substances in major raw materials which are banned or restricted in environmental labeling product : Yes☐ No☐							
Other supplementary materials (with certification of other environmental label, certification of ISO9001 or ISO14001 or other environmental awards)							

List of Application Materials for Environmental Labelling Certification (Enterprise in China)
